

HOW TO CREATE YOUR OWN EEVEE NAILS

Step-by-step guide

1. Before you start, fill and prep the nail with a base coat. You'll need to paint each nail with two coats of the base colour
2. Start with the cream ruff at the tip with three zig zags

3. Use your dotting tool and black polish for the eyes and then elongate them with your brush

4. Add a black nose and Eevee's mouth
5. Then add long brown ears, starting at the base

6. In between the ears, add a black zig zag line and eye detailing
7. In the same brown as the ears, add a “U” shapes in the eyes and finish off with white dots in the top left-hand corner

What you'll need – required tools and colours
